

15 November 1950

The Canadian Lakehead Wireless Experimenters

The regular meeting of The Canadian Lakehead Wireless Experimenters was held in the Fort William Public Library on 15 November 1950.

Bill Roberts - VE3ARN presided

The roll call revealed that there were nineteen members and visitors present.

The minutes of the meeting held on October 18th were confirmed on motion of Jim Patterson and Harold Peerenboom - VE3EAI.

Bill Roberts then turned the meeting over to Jim Patterson who gave an interesting talk on wave propagation. A vote of thanks was extended to him afterwards. An answer and question period was interesting and some very pertinent facts brought forward.

Considerable discussion took place in regard to the next regular meeting of the Club.

Moved by Harold Peerenboom - VE3EAI seconded by Alex Fulton - VE3AKI that the next regular meeting of the Club be held on December 13th as the regular time, December 20th, was much too close to Christmas. Carried.

It was decided by a show of hands that the next meeting would be a social and strictly stag.

Jim Patterson advised that the basement of the local R.C.A.F. buildings would be available for the next meeting. He asked if some of the fellows knew where some furniture could be obtained. Bert Lambert - VE3BKY said he would contribute a table and two chairs and also see if he could get some on loan from a local warehouse.

An entertainment committee was appointed to look after the next meeting as follows:

Bill Roberts - VE3ARN
Jim Patterson
Harold Peerenboom - VE3EAI

Moved by Frank Start - VE3AJ, seconded by Harold Peerenboom - VE3EAI that we do now adjourn. Carried.
